

Lift Cars

For every lift car - a perfect finish

01

A design to suit every setting

Whether your building is traditional or cutting-edge, no-frills or palatial, you are sure to find a lift car in our extensive range which will suit it perfectly and give your lift the personal touch that you are looking for.

02

Numerous interior design options

All our different lift car models offer an ample choice of wall and floor finishes, lighting fixtures, operating and display panels, handrails and other design details.

03

Adaptable to any shaft size or space

We manufacture our lift cars in a wide range of load capacities and dimensions, and we can build each car to suit the exact shaft size, thereby maximising usable space.

04

Easy to install

Every lift car is fully assembled and then disassembled before it leaves our factory, which guarantees its perfect operation and faster installation on-site.

05

Proven excellence

Our lift cars are internationally recognised for their quality of manufacture, our use of only the very best materials and components, their durability and their reliability.

06

European manufacture, right down to the last detail

We design and build our own lift cars from start to finish, in our own manufacturing plants in Santander, on the north coast of Spain.

46 How do you want your lift car?

NOTE: in terms of colours, materials and fittings, the designs pictured in this catalogue represent only a few of the many possibilities available across our full range of models. Do not hesitate to consult us if you want to explore the alternatives.

The 210 Series

The 210 series offers lift cars perfectly suited to all kinds of building projects, a functional design based on modular construction, offering a wide choice of up-to-date colours and built with high-quality materials chosen for their durability and resistance to wear.

Great design and the versatility to fit in well with any building

It is very hard to go wrong with the 210 model series: these lift cars are designed so that they can be harmoniously adapted to any building environment.

Rated loads: **available up to 1275 Kg.**

Simplicity: the lift car is supplied with the lighting and operating panel pre-wired. Unit assembly is easy and quick, and each is delivered with all the detailed information and documentation required.

The lift cars are built in accordance with the European Lifts Directive **2014/33/EU**, and are available in compliance with the harmonised European standards **EN 81-70** (disability), **EN 81-71** (vandal resistance) and **EN 81-72** (firefighters).

Customised individual design: special wall, floor and ceiling finishes are available on request. Cars can also be delivered ready for final fitting (light fixtures, flooring) by others.

Control panel on the left side of the elevator. It features a digital display at the top showing the floor number '2' and a '2' icon. Below the display are several buttons, including a green emergency stop button and a yellow emergency call button. The panel is mounted on a stainless steel frame.

Control panel on the right side of the elevator. It features a digital display at the top showing the floor number '2' and a '2' icon. Below the display are several buttons, including a green emergency stop button and a yellow emergency call button. The panel is mounted on a stainless steel frame.

Car construction

The lift cars in the **210 Series** are built in **sheet steel** and finished with **plastic laminates** in a wide range of colours, or in **stainless steel** in a choice of different textures.

The **car lighting** can be direct, using **LED spots** or **light panels**, or indirect, using **fluorescent lights** with a range of different **suspended ceiling panels** available.

The **car doors** are supplied with a **stainless-steel** finish in a **choice of textures**, and the **car fronts** can also have a **stainless-steel** finish in a range of **different textures**, as required.

The upper and lower **skirtings** are supplied with a **stainless-steel** finish in different textures.

The **car flooring** can be finished in **hardwearing black rubber**, in **granites** of different shades, in **marble** and in other resistant materials such as **aluminium**, **stainless steel** or **reinforced vinyl**.

The **handrails** are supplied with a **stainless-steel** finish, in a range of different configurations, according to customer choice.

The **mirror** can be supplied to fill **one-third**, **one-half** or the **entire width** of the car's **rear wall**, or we can supply the car **without a mirror**.

The 220 Series

The 220 series offers lift cars which are robust and hardwearing, and ideal for installation in lift systems designed to carry heavy loads, whether goods or passengers.

Excellent performance in the transport of heavy loads

The 220 Series has been designed to respond effectively to all the vertical transport needs of buildings with high volumes of traffic.

Proven durability and resistance: the 220 Series lift cars are sturdily built and reinforced to deal comfortably with intensive work conditions over a long period of time. The construction materials used are of top quality and notably hardwearing.

Additional protective measures: the cars can be reinforced with buffer rails and kick plates for greater durability and with any other materials and components requested by the customer to maximise their effectiveness over time.

Rated loads: **available from 1300 to 4000 Kg.**

Simplicity: the lift car is supplied with the lighting and operating panel pre-wired. Unit assembly is easy and quick, and each is delivered with all the detailed information and documentation required.

The lift cars are built in accordance with the European Lifts Directive **2014/33/EU**, and are available in compliance with the harmonised European standards **EN 81-70** (disability), **EN 81-71** (vandal resistance) and **EN 81-72** (firefighters).

Customized individual design: special wall, floor and ceiling finishes are available on request. Cars can also be delivered ready for final fitting (light fixtures, flooring) by others.

Car construction

The lift cars in the **220 Series** are built in **sheet steel** and finished with **plastic laminates** in a wide range of colours, or in **stainless steel** in a choice of different textures.

The **car lighting** is direct, using **LED spots** or **fluorescent lights**.

Ceilings and hatchways are finished in white **skinplate** or **stainless steel**.

The **car doors** are supplied with a **stainless-steel** finish in a choice of textures, and the **car fronts** can also have a **stainless-steel** finish in a range of **different textures**, as required.

The upper and lower **skirtings** are supplied with a **stainless-steel** finish in different textures.

The **car flooring** can be finished in **hardwearing rubber**, in **granites** of various shades, in **marble** and in other resistant materials such as **aluminium**, **stainless steel** or **reinforced vinyl**. It can also be supplied ready for finishing according to each customer's particular requirements.

The **handrails** are supplied with a **stainless-steel** finish, in a range of different configurations, according to customer choice.

The **mirror** can be supplied to fill **one-half** of the car's **rear wall** (maximum dimensions: 1400mm width, 1180mm height), or the **entire wall** (fitted in two pieces).

The 310 Series

We have kept the 310 Series in production for many years because of its outstanding success with our customers. It is a lift car with the cleanest of lines, extremely versatile and adaptable, robust and hardwearing. It is now updated, and it is available with an extensive series of optional extras. The safest possible bet for any serious building project.

Great design and flexibility

Its excellent interior finishes and the wide range of colours and materials available for customer selection make the 310 Series the ideal choice when looking for a top-quality lift car with a design standard to match.

Guaranteed durability: the 310 Series offers very robust, long-lasting and hardwearing lift cars eminently suitable for the transport of passengers and loads in high-traffic conditions.

Rated loads: **available up to 1275 Kg.**

Simplicity: the lift car is supplied with the lighting and operating panel pre-wired. Unit assembly is easy and quick, and each is delivered with all the detailed information and documentation required.

Lift cars: built in accordance with the European Lifts Directive **2014/33/EU**, they are available in compliance with the harmonised European standards **EN 81-70** (disability), **EN 81-71** (vandal resistance) and **EN 81-72** (firefighters).

Customised individual design: special wall, floor and ceiling finishes are available on request. Cars can also be delivered ready for final fitting (light fixtures, flooring) by others.

Car construction

The lift cars in the 310 Series are built in **galvanised sheet steel**, finished with **high-pressure laminates** in a wide range of colours, or in **stainless steel** with a choice of different textures.

The car lighting can be direct, using **LED spots** or **light panels**, or indirect, using **fluorescent lights** with a range of different **suspended ceiling** panels available in attractive designs.

The car doors are supplied with a **stainless-steel** finish in a choice of textures, and **the car fronts** can also have a **stainless-steel** finish in various textures, as required.

The upper and lower skirtings are supplied with a **stainless-steel** finish, also in a choice of textures.

The car flooring can be finished in **hardwearing rubber**, in **granites** of various shades, in **marble** and in other resistant materials such as **aluminium**, **stainless steel** or **reinforced vinyl**.

The handrails are supplied with a **stainless-steel** finish, available in a range of different configurations, according to customer choice.

The mirror can fill **one-third**, **one-half** or **the entire width** of the car's **rear wall**, or we can supply the car **without a mirror**.

The 350 Series

The 350 Series gives you the chance to order a completely unique and made-to-measure lift car. Tailor-made according to customer taste, designed to match the style of its setting, personalised with a company logo or emblem - the 350 Series offers all this, and a great deal more.

** To print an image, reduce it to at least 25% of its original size, and use CMYK chromatic composition at no less than 300 dpi.*

A one-of-a-kind lift car

A lift car with a landscape, city skyline or your company logo taking up an entire wall gives your building its own unique and unforgettable touch – a silkscreened panel, entirely of your choice.

Guaranteed durability: the 350 Series offers very robust, long-lasting and hardwearing lift cars eminently suitable for the transport of passengers and loads in high-traffic conditions.

Rated loads: **available to 1275 Kg.**

Simplicity: the lift car is supplied with the lighting and operating panel pre-wired. Unit assembly is easy and quick, and each is delivered with all the detailed information and documentation required.

Lift cars: built in accordance with the European Lifts Directive **2014/33/EU**, they are available in compliance with the harmonised European standards **EN 81-70** (disability), **EN 81-71** (vandal resistance) and **EN 81-72** (firefighters).

Customised individual design: special wall, floor and ceiling finishes are available on request. Cars can also be delivered ready for final fitting (light fixtures, flooring) by others.

VGCORP

Reaching the future

Car construction

The 350 Series lift cars are built with **galvanised-steel sheeting** finished in **high-pressure laminates** and available in a wide range of colours, or in **stainless steel** with a choice of textures and the rear wall is finished with a **silkscreened** panel to a design of the customer's choice, protected by **glass sheeting**.

The car lighting can be direct, using **LED spots** or **light panels**, or indirect, using **fluorescent lights**, with a range of different **suspended ceiling panels** available. The cars can be supplied **without lighting fittings**, should customers want to have them fitted themselves.

The car doors are supplied with a **stainless-steel** finish in a choice of textures, and **the car fronts** can also be finished in **stainless steel**, in a range of **textures**, as required.

The upper and lower skirtings are supplied with a **stainless-steel finish** in different textures.

The car flooring can be finished in **hardwearing rubber**, in **granites** of various shades, in **marble** and in other resistant materials such as **aluminium**, **stainless steel** or **reinforced vinyl**. Or it can be supplied ready for finishing according to each customer's particular tastes.

The handrails are supplied with a **stainless-steel** finish, in a range of different configurations, as chosen by the customer.

The 550 Series

Our much-admired 550 series, with its updated design, offers luxurious and sophisticated lift cars which combine the use of elegant and cutting-edge materials with stainless steel in various finishes.

A classic, triumphantly revitalised for demanding surroundings, impressive in its every detail.

Luxury and comfort

Each car in the 550 Series, with its sophisticated design and carefully thought-out detailing, adds an exclusive and de-luxe look to any setting.

Guaranteed durability: the 550 Series offers very robust, long-lasting and hardwearing lift cars eminently suitable for the transport of passengers and loads in high-traffic conditions.

Rated loads: **available to 1275 Kg.**

Simplicity: the lift car is supplied with the lighting and operating panel pre-wired. Unit assembly is easy and quick, and each is delivered with all the detailed information and documentation required.

Lift cars: built in accordance with the European Lifts Directive **2014/33/EU**, they are available in compliance with the harmonised European standards **EN 81-70** (disability), **EN 81-71** (vandal resistance) and **EN 81-72** (firefighters).

Customised individual design: special wall, floor and ceiling finishes are available on request. Cars can also be delivered ready for final fitting (light fixtures, flooring) by others.

Car construction

The **550 Series lift cars** are built in **galvanised sheet steel**, faced with **stainless steel** and then finished with horizontally-mounted panels of **high-pressure laminates** available in a wide range of colours and designs.

The **car lighting** can be direct, using **LED spots** or **light panels**, or indirect, using **fluorescent lights** with a range of different suspended ceiling panels available.

The **car doors** are supplied with a **stainless-steel** finish in a choice of textures, and the **car fronts** can also be finished in **stainless steel**, in various textures, as required.

The **upper and lower skirtings** are supplied with a **stainless-steel** finish, also in a choice of textures.

The **car flooring** can be finished in **hardwearing rubber**, in **granites** of various shades, in **marble** and in other resistant materials such as **aluminium**, **stainless steel** or **reinforced vinyl**.

The **handrails** are supplied with a **stainless-steel finish**, available in a range of different configurations, according to customer choice.

The **mirror** can fill **one-half** of the car's rear wall or its **entire width** (at 300mm from the floor). Or we can supply the car **without a mirror**.

The 710 Series

Classical elegance. Timeless style. Tradition and craftsmanship. Feelings inevitably evoked by the 710 Series lift car. Cars finished in beautiful hardwoods which add an inimitable warmth and richness to the very finest architectural surroundings.

Timeless luxury

The 710 Series is so much more than just another lift car. The beauty of its materials, its classical style and its finely crafted finish make each car a unique little work of art.

Rated loads: **available to 1275 Kg.**

Simplicity: the lift car is supplied with the lighting and operating panel pre-wired. Unit assembly is easy and quick, and each is delivered with all the detailed information and documentation required.

Lift cars: built in accordance with the European Lifts Directive **2014/33/EU**.

Customised individual design: special wall, floor and ceiling finishes are available on request. Cars can also be delivered ready for final fitting (light fixtures, flooring) by others.

Car construction

The **710 series lift car** is built over a **metal structure**, finished with **solid oak** or **chestnut panelling** and trimmed with **natural** or **gold-finished stainless steel**, as required.

The **car lighting** is direct using **LED spots**.

The **car doors** are supplied with a **stainless-steel** finish in a choice of textures, and **the car fronts** can also be finished in **stainless steel** in a range of textures, as required.

The **lower skirting** is of **stainless steel** with a **gold finish**.

The **car flooring** can be finished in **hardwearing rubber**, in **granites** of various shades, in **marble** and in other resistant materials such as **aluminium**, **stainless steel** or **reinforced vinyl**.

The **handrails** are supplied finished in **solid oak** and with side details in **natural** or **gold-finished stainless steel**.

The **safety-glass** mirror is to the **full height** and width of the rear wall and is **timber-framed**, with **natural** or **golden stainless-steel** detailing.

Lift car Smartech display

Lift availability before travel

The screen tells you if the lift is available for use.

Smartech AutoTest Function

Checks and displays the correct functioning of the safety components and system before the start of each journey.

Position & direction

Shows the location of the lift within the building at all times, as well as direction of travel.

Destination floor & time remaining before arrival

Indicates the floor to which the lift is travelling and the time remaining before arrival, expressed in seconds.

Speed

Passengers are kept informed in real time of the car's speed on each journey, from departure until arrival at the destination floor.

Energy consumption

Indicates if the lift is consuming energy or generating it during travel, thereby reducing the building's operating costs.

Arrival at destination floor alert

Informs passengers when the lift reaches the destination floor.

Date & time

Displays the time and date in real time.

Load & passenger capacity

Indicates the maximum permissible load, in kilograms, and the maximum number of passengers that can travel in the lift car.

Landing Smartech HR Display

 Includes voice synthesiser!

Welcome messages

The screen greets passengers with messages corresponding to the particular time of day.

Position & direction

Indicates to passengers waiting on a landing the location of the car and its direction of travel in real time.

Flashing LED display by the lift entrance

Alerts passengers to the imminent arrival of the lift.

Situation reports

The display transmits relevant information to passengers: such as when there are too many people in the lift car, when the lift door is blocked and when people are entering or leaving the car, among others.

Lift arrival countdown

The display shows a progress bar and countdown in seconds, accurately updated in real time, so that passengers know exactly when their lift will arrive.

Energy consumption

Indicates if the lift is consuming energy or generating it during travel, thereby reducing the building's operating costs.

Voice messages

The screen device shares travel information with passengers via a voice synthesiser built into the door frame. Its volume is automatically adjusted according to the particular time of day.

How do you want your lift car?

We design and manufacture made-to-measure lift cars to suit the exact needs and tastes of our customers.

The range of materials, finishes, lighting and display options, and of equipment upgrades and extras that we offer is practically limitless and guarantees that each lift car will be perfectly in tune with the technical, operational and design requirements of the building that it serves.

Designed and manufactured in Europe

- ✓ All the products we design are produced entirely in-house in our own European factories – ever since 1968.
- ✓ Meeting all the European quality standards.
- ✓ Particularly regarding safety, sustainability and environmental care.
